

ATRI– Advanced Transaction Routing Interface

ATRI provides the merchant with load balancing functionality across an unlimited number of MIDs.

Credit Cards

Transactions can be automatically routed to maintain the dollar amount or percentage allocated.

[\[Reset LB Amounts\]](#)

Credit Cards

Check This Box to Enable Load Balancing For Credit Cards

| Processor ID | Processor Name | Monthly Amount | Default | Max Ticket | Overall Limit | LB Amount |
|------------------|------------------|----------------|----------------------------------|------------|---------------|-----------|
| (1) default | Tuition | \$ 50000.00 | <input type="radio"/> | \$50.00 | Unlimited | 108% |
| (2) 2ndaccount | PFA | \$ 50000.00 | <input type="radio"/> | \$50.00 | Unlimited | 100% |
| (3) ccprocessora | Golden-Palms Apt | \$ 0.00 | <input type="radio"/> | \$0.00 | Unlimited | 100% |
| (4) ccprocessorb | The Forum | \$ 0.00 | <input checked="" type="radio"/> | \$0.00 | Unlimited | 100% |

Merchant Defined Field Transaction Routing

Merchant defined fields can be used to route transactions to associated MIDs (Identification). The API can be used to programmatically route transactions.

Merchant Defined Field Transaction Routing

| | Value | (1) | (2) | (3) | (4) |
|--------------------|--------------|----------|----------|----------|----------|
| Vitamins selection | red | 50.00 % | 50.00 % | | |
| Vitamins selection | blue | | | 50.00 % | 50.00 % |
| Vitamins selection | yellow | | | | 100.00 % |
| Total Amount | 4.99 | 100.00 % | | | |
| Sales Rep | 1 | 50.00 % | 50.00 % | | |
| Race car # | ccprocessora | | | 100.00 % | |
| Race car # | ccprocessorb | | | | 100.00 % |
| Race car # | 2ndaccount | | 100.00 % | | |
| Stanley Cup Champs | 1 | 100.00 % | | | |
| Stanley Cup Champs | 2 | | 100.00 % | | |
| Stanley Cup Champs | 3 | 33.33 % | 33.33 % | 33.33 % | |

Processor

Custom descriptors can be used when adding MIDs within the Virtual Terminal. Users can manually select an individual MID to route a transaction.

Processor

Processor CC Processor A
 CC Processor B
