

## iProcess™ Mobile Application

### iProcess™ Mobile Application

- An innovative mobile payments processing solution that provides you the flexibility and convenience to accept credit card payments anywhere in the world with a data connection.
- iProcess™ works through an extensive coverage area such as WIFI, 3G/4G or EDGE.
- Can be downloaded from the Apple™ App Store & Google™ Play Store.
- Application compatible with Apple™ & Android™ devices.
- Our swipe solution is hardware encrypted.
- Process keyed or swipe transactions with retail rates.
- Add multiple MIDs inside iProcess™.
- Geotag the location on receipt.
- Capture digital signatures and add tip amount charged if needed.
- Receipts can be emailed or SMS.
- Perform full or partial refunds via Transaction History Log.
- Application is free to download and no additional per transaction fees apply.
